EDUCATION

University of Soran

Bachelor of Science in Computer Science

2021 - 2025

Soran

- **Proficient in:** JavaScript, HTML, CSS, PHP, MySQL, and Arduino.
- **Experienced with:** C#, Python, Adobe photoshop.
- **Skills:** Full Stack Web Development, Hosting and Domain Setup, Admin Panel, API Integration, and Databases.
- **Graduation project** selected by the university as an outstanding senior project.

WORK EXPERIENCE

Social Media Manager

Santorìa (Men's clothing brand, 20+ branches).

2025 – Present

- Managed Instagram and Facebook pages as the sole social media manager across all branches.
- Edited and enhanced photos using Adobe Photoshop to maintain brand consistency.
- Created and published engaging content, including captions, stories, and weekly sponsored campaigns.
- Managed customer interactions via chats, calls, and comments, providing support in Arabic, contributing to increased engagement.

Website Development (freelance)

pharmatechcategory.com

2025

- JavaScript, HTML, CSS, PHP, and MySQL
- Developed a fully responsive, dynamic website with a stable and user-friendly system tailored to local business.
- The platform includes a custom admin panel for managing products, categories, product details and customer messages.
- Setup included domain registration, hosting configuration.
- Maintaining hosting for 1 years (ongoing).

khamoshco.com

2025

- JavaScript, HTML, CSS, PHP, and MySQL
- Developed a fully responsive, dynamic website with a stable and user-friendly system tailored to local business.
- The platform includes a custom admin panel for managing products, categories, and customer messages.
- Setup included domain registration, hosting configuration, and Gmail integration.
- Maintaining hosting for 4 years (ongoing).

dlgash.neocities.org

2024

- JavaScript, HTML, and CSS.
- Developed a responsive, static website to showcase dental products and services for university students.
- Massive success with +5,000 views and reaching beyond university students (client goal).

Didam Store

2024

- JavaScript, HTML, and CSS.
- Contributed as part of a team to developing a website for Didam Store for their internal use.
- Built a responsive, user-friendly interface while ensuring alignment with the team's overall design goals during a one-week collaborative effort in Sultan Muzaffar.

- JavaScript, HTML, and CSS.
- Contributed as a designer and front-end developer within our team, helping create a functional and visually engaging website.

Graduation Project

nafas.freeservice.site/public — with hardware model

2025

- Selected as an outstanding senior project by University of Soran.
- JavaScript, HTML, CSS, PHP, MySQL, and APIs for the website. Arduino and ESP modules for the hardware.
- MySQL is used for the database. (Website and database are still functional, but the data is from its demonstration.)
- Designed and developed a complete air quality monitoring system for my 4th year project.
- The system included hardware components such as Arduino, gas sensors, and ESP modules to detect harmful gases and display real-time data. It also included a dynamic interface accessible both through the website and through its own standalone mobile application (Android).

Entrepreneur / Owner – Small Cosmetics Business

2024 – 2025

- Managed online and offline sales of imported cosmetics, building a consistent customer base.
- Created and ran an Instagram page with product photography, captions, and promotional posts.
- Gained practical experience in digital marketing, customer relations, and inventory management.
