Locating Inside the building from specific point with the help of mobile phone sensors and the feature of Wi-Fi devices

Creating an indoor location method by clustering, Wi-Fi signal strength and mobile sensors

Mohammad Amin Taghizadeh

IT and Network Support Specialist, "10+ years of experience" |
Learning Security (Google Cybersecurity Analyst , CEH, PWK, Sans 504)

Ahwaz, Khuzestan Province, Iran

Summary

Studied as an Information Technology Engineer (Bachelor) and Computer Networks Engineer (Master) along with more than 10 years of experience in this work. learn how to use this knowledge to solve everyday challenges.

- Looking for even more challenges, I started learning CCNA, MCSE, MikroTik, and Google IT Support Specialist Certificate, and also working in this field as a Freelance Network Engineer. I am still up to new challenges and decided to work in another company, seeking new opportunities to learn different areas of computer networks.

Skills & Qualifications :

- Deep knowledge of IPV4, OSI Model, and TCP/IP Model
- Advanced working expertise of LAN technologies(VLANs and IP-subnetting)
- Worked as a team member and developed Team
- Experienced with major industry network equipment configuration (e.g. Cisco).
- Proven analytical and problem-solving abilities.

Hands-on Experience Technologies:

- Routing Skills: OSPF, EIGRP, Route-map
- Switching Skills: Vlan, Mac Address-table
- Monitoring Tools: PRTG
- Virtualization: VMware Workstation
- Cisco Switches: 3750,2960
- Mikrotik Routers and RouterOS operating system
- CPE (Modems, ONTs, personal routers, and home/small business wireless systems)
- Design and implement Microsoft Services Management (AD - DNS - DHCP - FTP)

And I'm doing things related to the helpdesk and network and cameras

Experience

Hejrat Distribution Co.

Information Technology Associate

March 2014 - Present (11 years 10 months)

Ahwaz

- Network Design and installation
- Support network, server, PC, camera and handheld system
- System troubleshooting and problem solving
