PROFESSIONAL SKILLS

Frontend: React, JavaScript, TypeScript, HTML/CSS, Vue.js

Backend: Node.js, Express.js, Python, REST APIs

Databases: PostgreSQL, MongoDB

Tools & Platforms: Git, Docker, Azure, Google Cloud

Other: REST APIs, Microservices, Agile workflow

PERSONAL SKILLS

Responsible and communicable.

Team player

Positive "can-do" attitude

Constant learning spirit.

LANGUAGES

English Working Proficiency

Finnish B2 / Working Proficiency

ACHIEVEMENTS

Second Place in TX's Web3 Challenge Track at Junction 2022.

Created an MVP of a brand marketplace using blockchain technology and Google Cloud Video Intelligence API with the goal to ensure fair pay for content creators based on the performance of their work.

PROFILE

Software Developer with 2+ years of experience building responsive, user-friendly web applications using **React, JavaScript, TypeScript, Node.js, REST APIs**, and modern UI frameworks. Strong focus on performance, clean code, and reusable components. Experienced in agile development, debugging complex issues, integrating APIs, and collaborating with cross-functional teams. Passionate about delivering fast, accessible, and scalable digital solutions.

WORK EXPERIENCE

Software Developer at Cyberday | Agendum Oy 2023 - present

- Developed frontend features for a cybersecurity compliance platform used by 1,000+ organizations across the Nordics.
- Built reusable UI components in React, improving development speed and consistency across the product.
- Fixed 20+ high-priority bugs, increasing system stability and improving user experience.
- Improved front-end performance by optimizing API calls and refactoring legacy code.
- Collaborated with designers and backend developers to deliver high-quality releases in an Agile/Scrum environment.
- Contributed to backend logic using Node.js + REST APIs.

PROJECTS

TinBike – Social App for Bikers

React Native, Node.js, MongoDB

- Built a mobile app concept that connects motorcyclists, shows nearby riders, and enables group rides.

Adverse Marketplace – Junction 2022 (2nd Place)

React, Node.js, Web3, Google Cloud Video Intelligence API

- Created an MVP marketplace using Web3 & Video Intelligence API to ensure fair pay for content creators.

EDUCATION

Taitotalo

- Information and Communication Technology/Python | November 2024- June 2025

Integrify

- Software Development Academy | January - June 2022

Self Studies

- Software Engineering | courses on Udemy
- Full-stack Open (2022-2023) | online course from Helsinki University
