PROFESSIONAL EXPERIENCES

2009-2014

1- In 2009, I began my journey working at Basra International Airport as an administrative and security coordinator with the international coalition forces present at Basra Airport. My job was to organize entry and exit procedures for people working inside the military airport through the military airport gate for the American army. After that, I worked as a translator in an office. Issuing security visas with the American forces for people working inside the military airport in Basra. Until the end of 2011, I moved on to work as a team leader and translator with the G4S company under the Wiley Parson contract.

2- At the end of the year 2012, I moved to work in a new contract with the G4S company until the middle of the year 2014 in the PB company contract in the south of the Rumaila oil field, and I held the position of assistant 2ic, team leader and translator. After that, I moved to work in the main security office inside the PB company camp and held the position Kieber is due to end the contract in mid-2014.

3- At the end of 2014 until the end of 2015, I worked with Shell Company in the Majnoon oil field in the main security office at Shell PC Camp, and I held the position of observer and camera operator, and I also worked as a radar observer. At the beginning of 2016 to the end of 2017, I worked as a security team leader and translator with G4S Company in a General Electric contract in the Zubair oil field. I was the leader of a PSD team consisting of 12 people and 3 armored cars, equipped with communications equipment and weapons. The team's mission was to protect customers and transport them from one place to another. Their residence to their place of work.

Job Title: Fast Intervention Team leader

Duration: July 2023 – Present

Company: {The Safe Direction}

Main Duties:

In July 2023, I worked with the (SAEF DIRECTION Company) after completing all the important training courses. I was initiated in the Rapid Intervention Team (FIT) as a team leader in the Rumaila oil field, which is one of the largest fields in the world.

The tasks of this experienced emergency response team in the Rumaila oil field

When emergencies hit inside the Rumaila oil field, a dedicated team stands ready to respond quickly and effectively. Meet with the Rapid Intervention Team (FIT), a highly trained and specialized team responsible for providing immediate assistance and support during accidents and emergencies.

The FIT trainee team works in all conditions within the oil fields is a professional team equipped with the knowledge, tools, and resources necessary to ensure the safety, security and well-being of all employees and assets within the oil field. With their experience in emergency response, risk identification and incident management, the (FIT) team plays a vital role in mitigating risks and maintaining a safe work environment. As well as experience in rapid response to incidents and transporting important information through the same work and immediate and direct contacts with the

operations room of the Rumaila Operating Authority SCCC. The team consists of three people who have the ability and high experience, where everyone works within the tasks entrusted to it and are considered as one line in the rapid response to the emergency call. Since the beginning of work in this team, many of the tasks entrusted to it have been completed and high experience has been gained in knowing all the important details related to the Rumaila oil field. Within the past year, all the details related to the southern or northern Rumaila field and on the oil, stations scattered in this field have been known and visiting all wells. The oil spread inside the Rumaila field, and the entrances, exits and dangerous areas of this field have been known. The emergency response team is an integrated team that works under the supervision of experts and professionals. We have gained great experiences that make us proud to work with them.
