I have experience in IT systems administration, DevOps, and network management. Over the years, I have worked on managing and maintaining Linux servers, deploying applications using Docker and Kubernetes, and supporting cloud and data center infrastructure. My work also includes setting up and monitoring networks, improving system performance, and ensuring stable and secure operations. I enjoy learning new technologies and applying them to make IT environments more efficient and reliable.

WORK EXPERIENCE

2024–Present | DevOps–System Administrator

codescope (Roda10-Karabala) Responsible for managing and automating cloud infrastructure on Linode, deploying and maintaining containerized applications in Kubernetes clusters, implementing CI/CD pipelines, and ensuring system monitoring, security, and reliability across environments.

2024 – Present | IT & DevOps Instructor

Al-Warith Academy for Information Technology Working as instructor specializing in Computer Networks, System Administration, and DevOps technologies. Responsible for delivering hands-on training in Linux server management, Docker, Kubernetes, and other cloud and automation tools. Focused on equipping students with the practical skills needed to build, deploy, and maintain modern IT infrastructure effectively.

2023–Present | DevOps–System Administrator– IT infrastructure

Managing DevOps operations and Linux systems at Imam Hussain Holy Shrine – overseeing data center infrastructure, automating deployments, and ensuring reliable, secure, and monitored production environments.

2021 – 2023 | Project Manager & Sales Coordinator

CDH Enterprise – Managed client relations and software projects – identifying customer needs, preparing UI/UX prototypes, coordinating with the development team, and ensuring project delivery that meets client satisfaction.

2016 – 2024 | IT Specialist

Al-Imam Al-Hussein Media Group – Managed and developed the organization’s data center infrastructure, including Linux/Windows servers, network setup, firewall systems, and security testing. Provided IT support for over 200 employees, supervised the setup of new branch offices, and collaborated with vendors to enhance technology and system performance across the organization.

2014 – 2016 | Business Development & Office Manager

Al-Murtaqab IT Solutions Managed office operations and technical support for internet services, ensuring smooth service delivery. Later contributed to business development, identifying client needs, building partnerships, and supporting the company’s expansion into e-commerce and banking solutions.

2014 – 2015 | Network Technician

Seventh Dimension IT Solutions & ISP – Provided technical support for client internet towers, ensuring stable connectivity and network performance. Gained hands-on experience in network troubleshooting, server setup, and storage management, delivering reliable and efficient internet services.

2014 – 2016 | Team Leader

Supervised the installation and maintenance of internet towers, ensuring proper setup, connectivity, and reliable operation. Managed a team to deliver high-quality service and post-installation support.

2011 – 2013 | Translator & Electrical Team Leader

Yüksek Construction (Turkey) – Worked as an Arabic–Turkish translator, facilitating communication between teams and translating technical documents. Later promoted to Team Leader in the electrical division, overseeing installation and maintenance of electrical systems and ensuring project quality and safety compliance.
