PROFILE

I'm a dedicated technology graduate who ranked second in my major, with strong expertise in backend development using Java, C#, and SQL. My graduation project (a secure Android credit card application featuring multi-factor authentication) highlights my passion for developing reliable and user-focused solutions. I'm driven by problem-solving, continuous learning, and creating technology that makes a real difference.

PROJECT EXPERIENCE

- 2024-2025 - Graduation Project

Credit Card Android Application

SecurePay

 - Developed a secure mobile payment app using Xamarin.Forms and C#
 - Implemented multi-factor authentication using SMS and email verification
 - Features included balance tracking, transaction history, bill payment, and fund transfer
 - Focused on backend structure, data security, and user-friendly design
- 2023-2024 - Summer Training

Deanship of the College of Science

 - Gained practical exposure to administrative and academic support systems
 - Assisted in organizing digital records and supporting internal technical processes
 - Observed day-to-day operations and improved communication and teamwork skills
 - Learned how large institutions manage data and technical workflows
