

SADEQ SABAH

Telecommunication Engineer

Profile

I am a recently graduated Communications Engineer with a strong passion for this field and a keen interest in pursuing a career within one of its specialized areas. During my studies, I completed numerous courses related to mobile communications and gained foundational knowledge in CCNA. I am eager to further develop my expertise and gain practical, hands-on experience in the communications industry. I passed the first round. My sequence in the batch is 6, meaning I am among the top students.

Experience

Worked as a wireless site engineer at Supercell, with experience in QC, ATP, and basic installation of telecom towers and microwave links.

In my graduation project, I designed an optical communication system using the OptiSystem program. Eight high-speed 3 Gbps channels over an optical transmission line were simulated using several dispersion compensation techniques. A significant distance of 500 kilometers has been achieved.

Education

Bachelor of Engineering, Major in Optical Communication
2021-2025

University of Technology, Baghdad

Courses

- GSM, GPRS & EDGE From A to Z
- CDMA, UMTS and HSPA From A to Z
- Telecom basics
- 4G-LTE Drive Test & Post processing
- Master Excel: From Beginner to Advanced
- IP Addressing and Subnetting - Zero to Hero
- Practical Cisco Networking Labs in Cisco Packet Tracer
